Head of Housing and Local Government

Microsoft UK

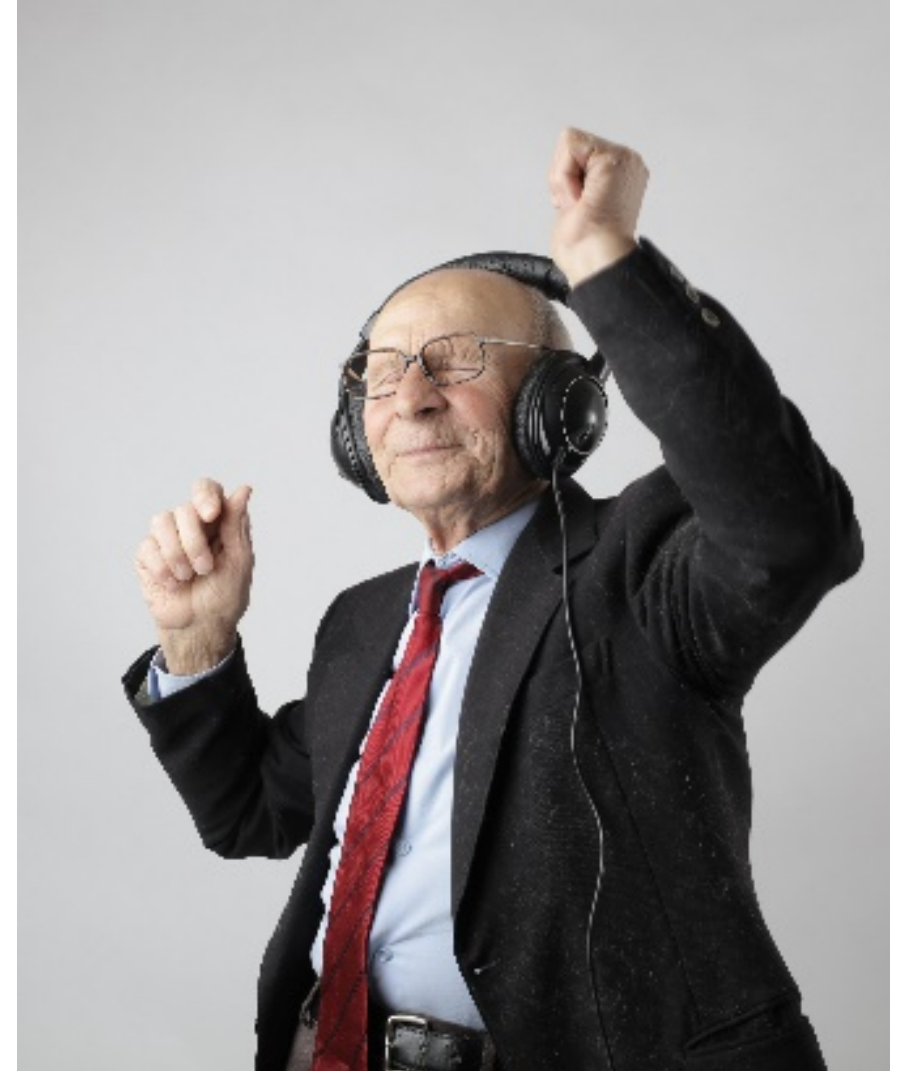

How we think about the Journey of Life

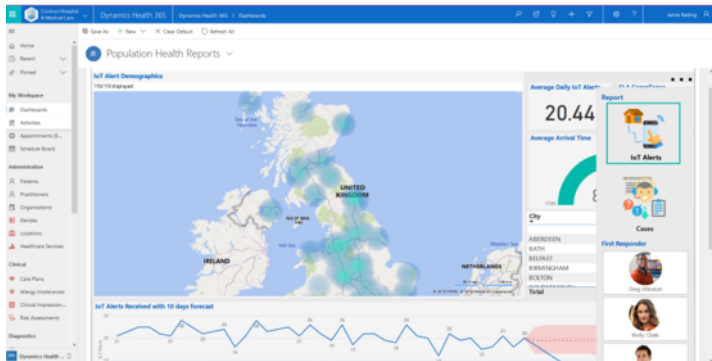

PERSON TAILORED SERVICES

- Create personalised and inclusive experiences which work for people and their families where they live.
- Make it easier for people to find the help they need in neighbourhood.
- Empower staff to provide care to those who need it – in their own homes and virtually.
- Improve digital interaction between care practitioners and individuals/families to support communication.

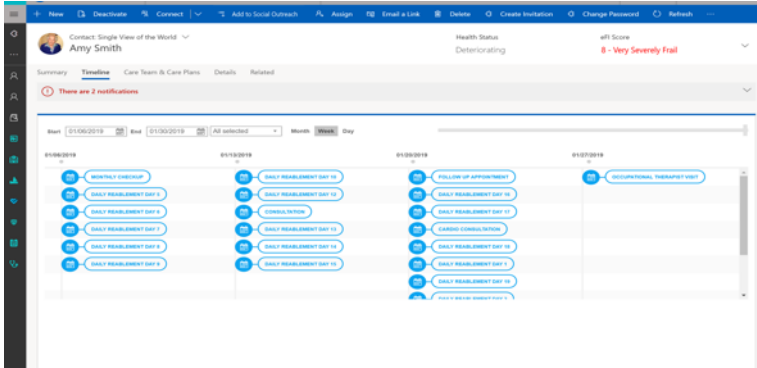

Addressing health and well being requires a joined-up view into the wider determinants of health
