IG Shared Spaces (IGSS)

Conceptually a move from multi-generational spaces – spaces occupied by individuals of different generations – to intergenerational communities, where place encourages formal and informal interactions between people of different ages and generations.

Intergenerational Communities – Copyright WXPC

IGSS and Covid-19

CV-19 has highlighted that while many families care for and support their older relatives, this is not possible for many older adults.

IGSS and **Urban Environments**

IGSS and Urban Environments

Old Oak co-living space in west London – The Collective and PLP Architecture

Marmalade Lane in Cambridge, a cohousing development of families, young workers and older adults, who jointly manage their living environment.

Granby Four Streets in Liverpool, which is being retrofitted through community land ownership to turn empty buildings into affordable homes, creating accessible shared public space.

The **Donnybrook Quarter** social-housing project in east London is an example of low-rise, high-density housing that is also low cost and high quality.

Dronningensgade Street in Copenhagen's Christianshavn district.
